

Rock Solid Yield Through
Cross-Chain Asset Aggregation & Yield Marketplace

Stone.defi – Executive Summary

Stone - is the only yield management protocol focused on creating Rock Solid Yield for all the users in the DeFi ecosystem.

Stone is positioned as the anchor yield aggregation platform, and eventually Stone will evolve to be a cross-chain asset aggregation and yield marketplace with the inclusion of multi-chain Proof of Stake ("POS") assets such as Eth2.0 and Polkadot.

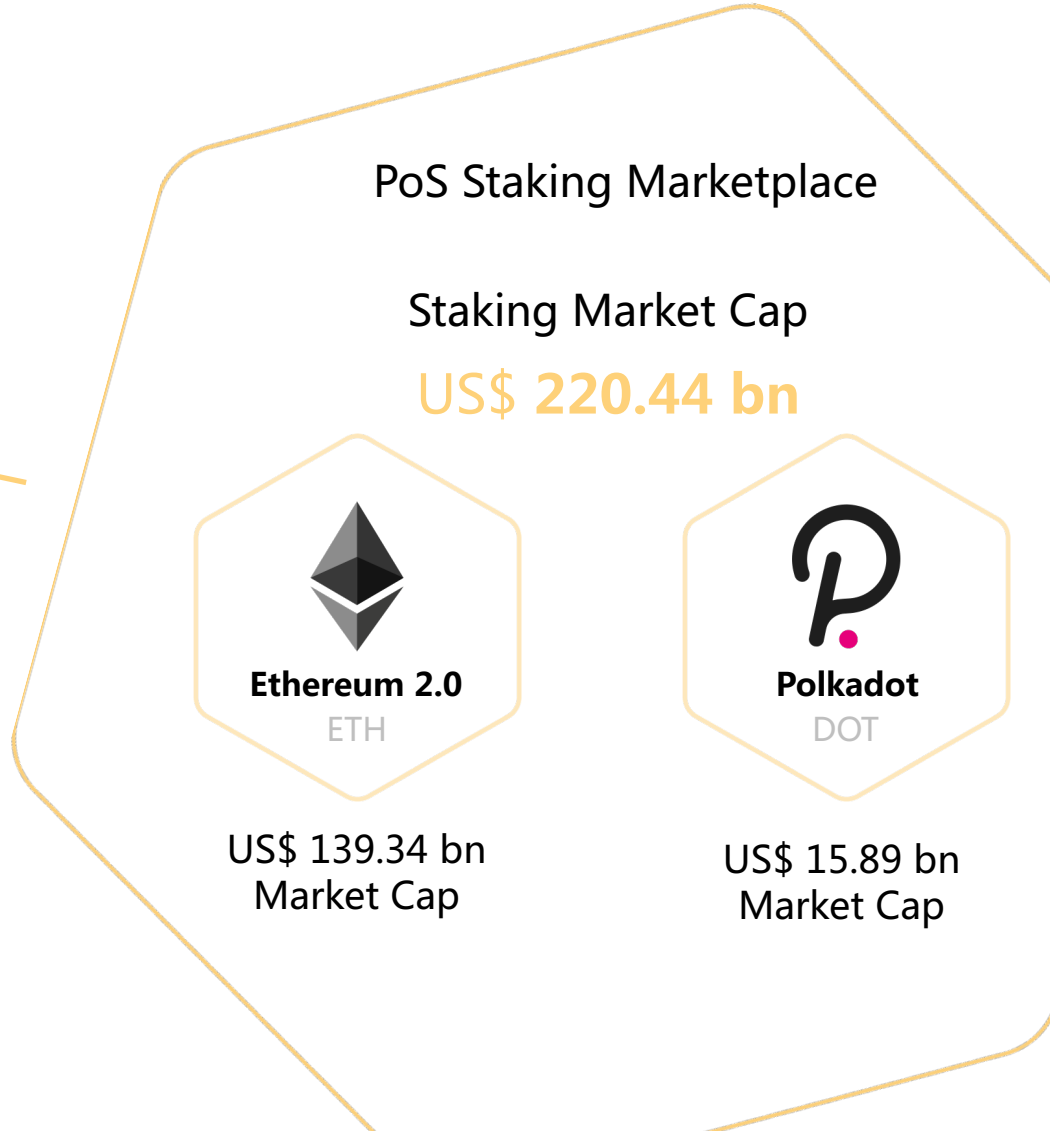

The focus is developing innovative asset pools that maximizes return while keeping the LP capital as safe and secure as possible. In doing so, we aim to create a robust passive income platform to meet the needs of the DeFi industry.

With the inclusion of yield-bearing assets introduced by Stone, we will further create the yield based derivatives such as Risk Optimized Yield indices and other derivatives.

STONE Opportunities

Anchoring a \$200bn global yield market

**STONE brings in new assets,
new strategies and new products**

Passive Income
Vaults

Cross-Chain
Strategies

Liquid POS
Yield Streams

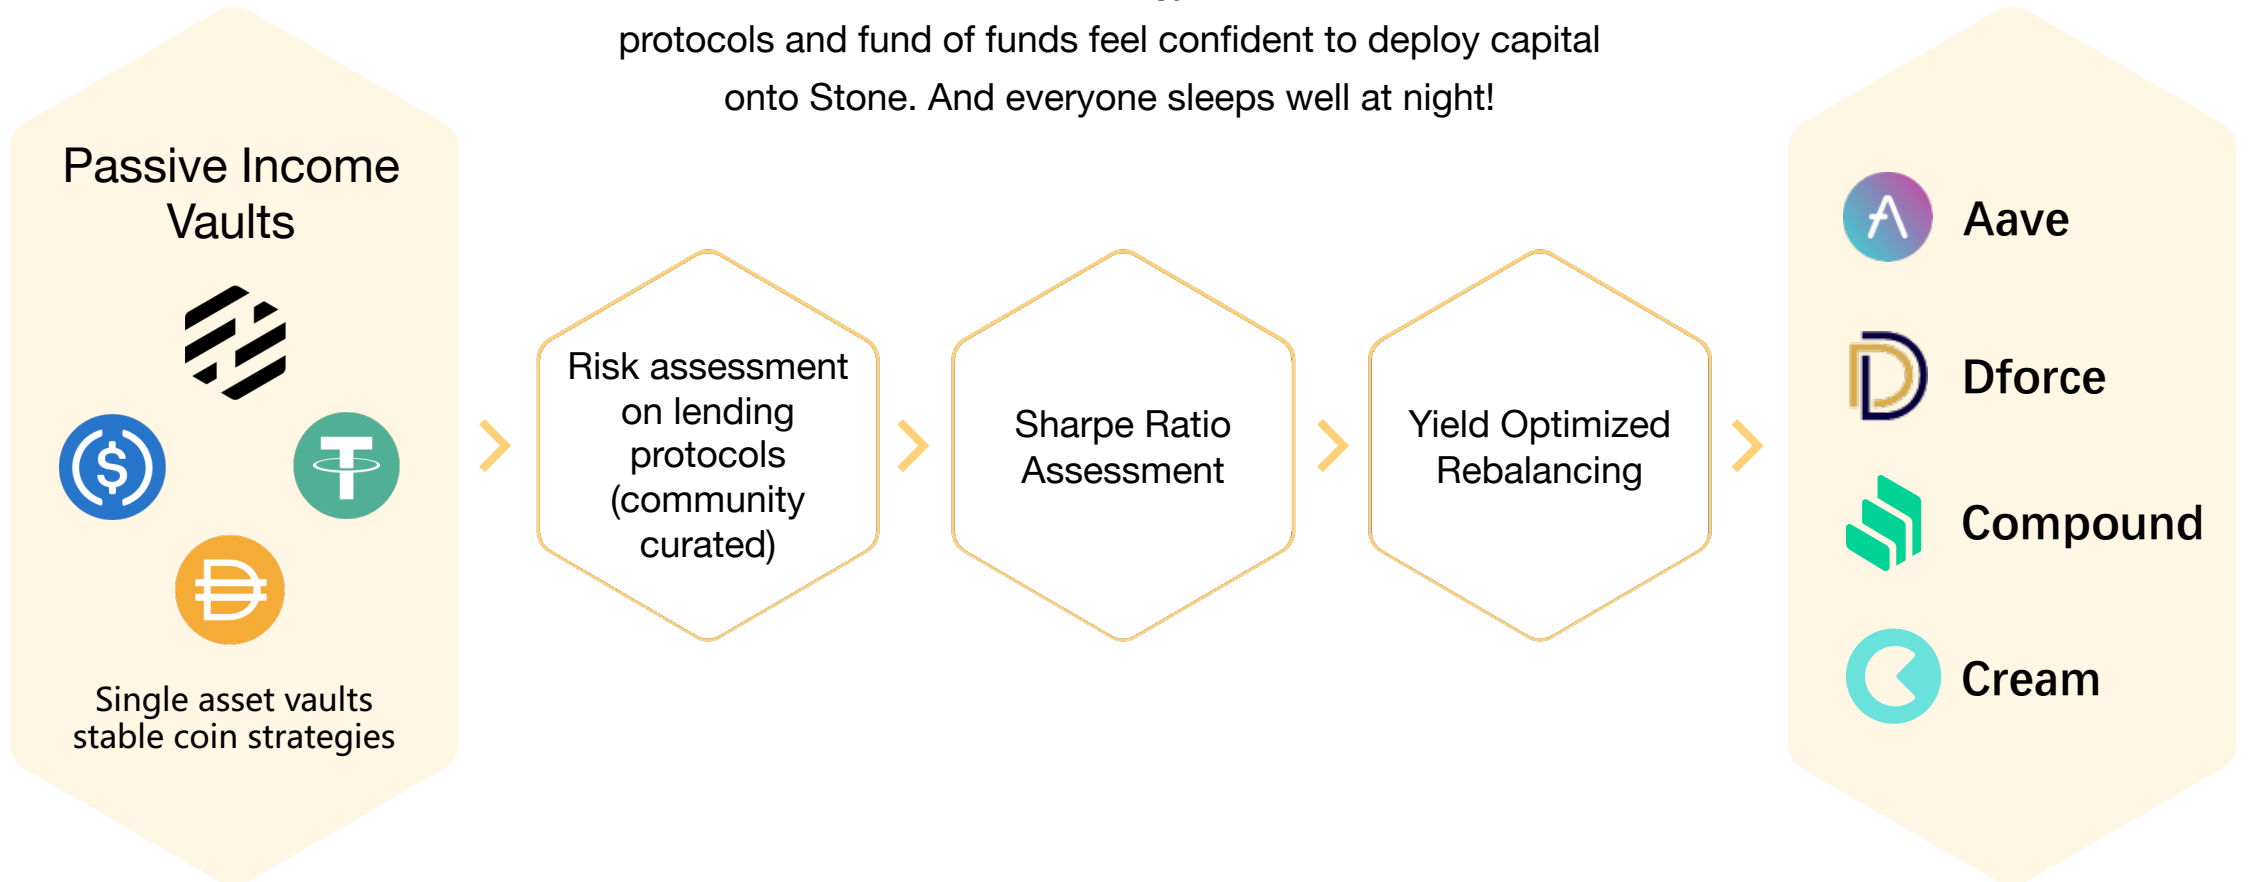

Risk Optimized
Yield indices

STONE: Defi Yield Aggregation

Portfolio Allocation

With a Rock Solid Yield strategy, we foresee insurance protocols and fund of funds feel confident to deploy capital onto Stone. And everyone sleeps well at night!

STONE: Liquid PoS Yield Streams

 **ETH 2.0** - aETH, bETH, cETH, etc.

 **Polkadot** - StaFi, Bifrost, Acala

Wrapped tokens to erc20 ecosystem -
Solana, Oasis, Terra, Iost

-  Solana
-  Terra
-  Oasis
-  Iost

Dex

-  Uniswap
-  DoDo
-  Mooniswap

Yield maximization
farming pools

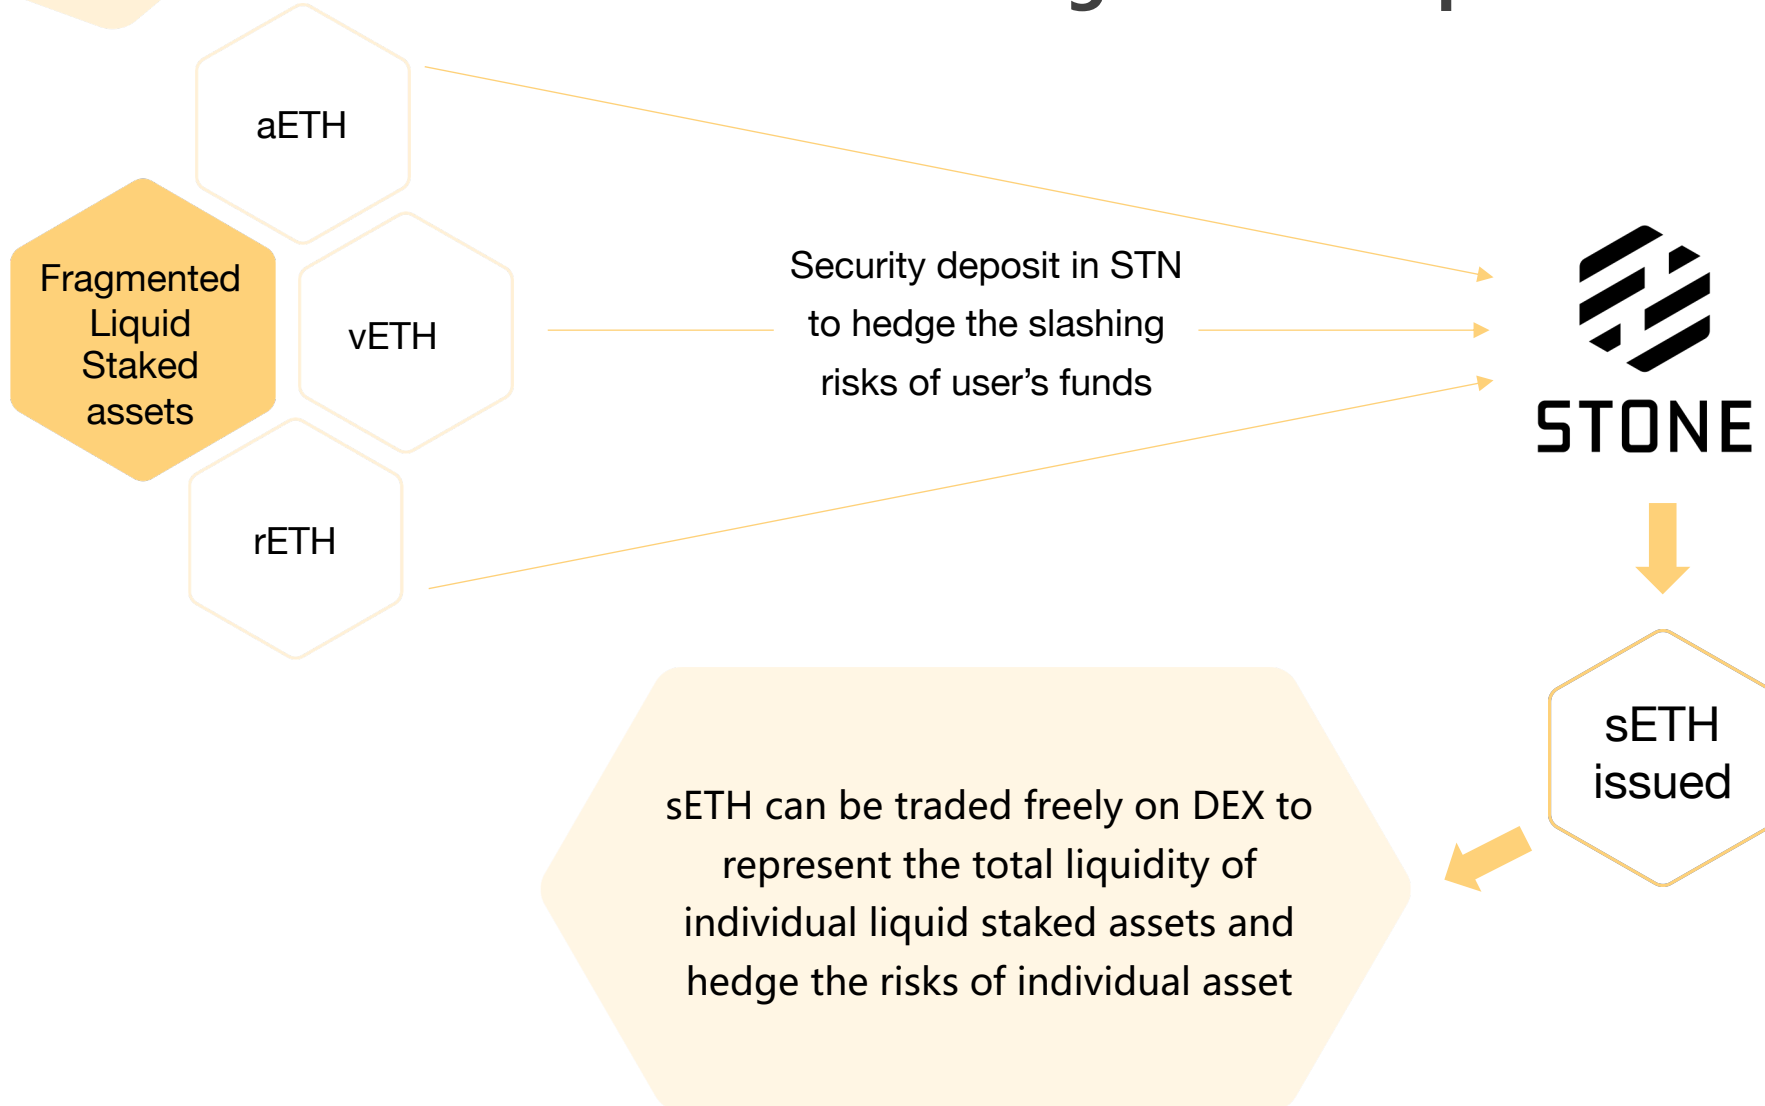

Portfolio allocation for rock solid yield

-  Aave
-  Dforce
-  Cream
-  Compound

Example of sETH

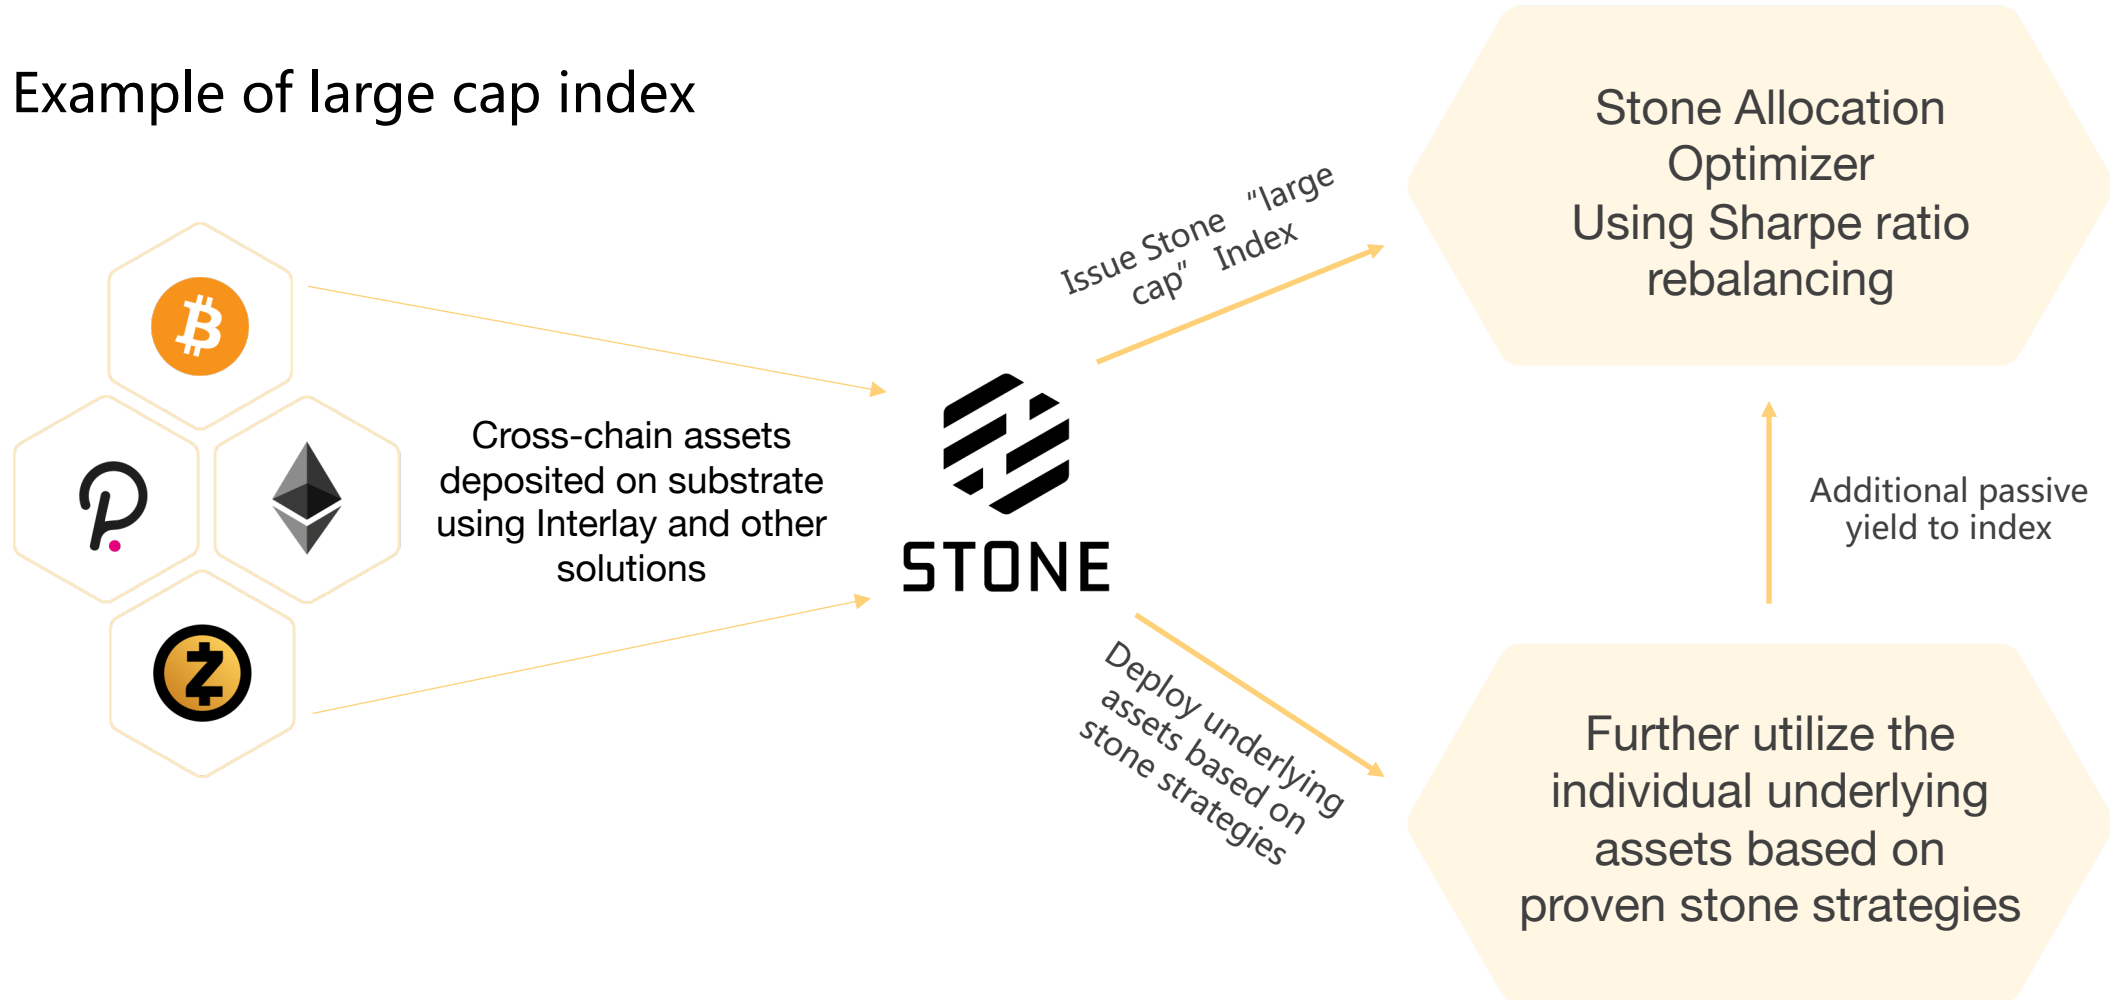

sETH/ sDOT to consolidate fragmented liquid staked assets

STONE: Cross-Chain Asset Aggregation & Risk Optimized Yield index

Example of large cap index

STONE: Business Income Stream

Lending Income

Asset deposited with Stone, when using for lending use, Stone will charge partial of the lending interests

Transaction Fees

Underlying transaction fees sharing via LP tokens deposited with Stone

Management Fees

1.0% – 2.0% of AUM will be charged as management fees per annum

Performance Fees

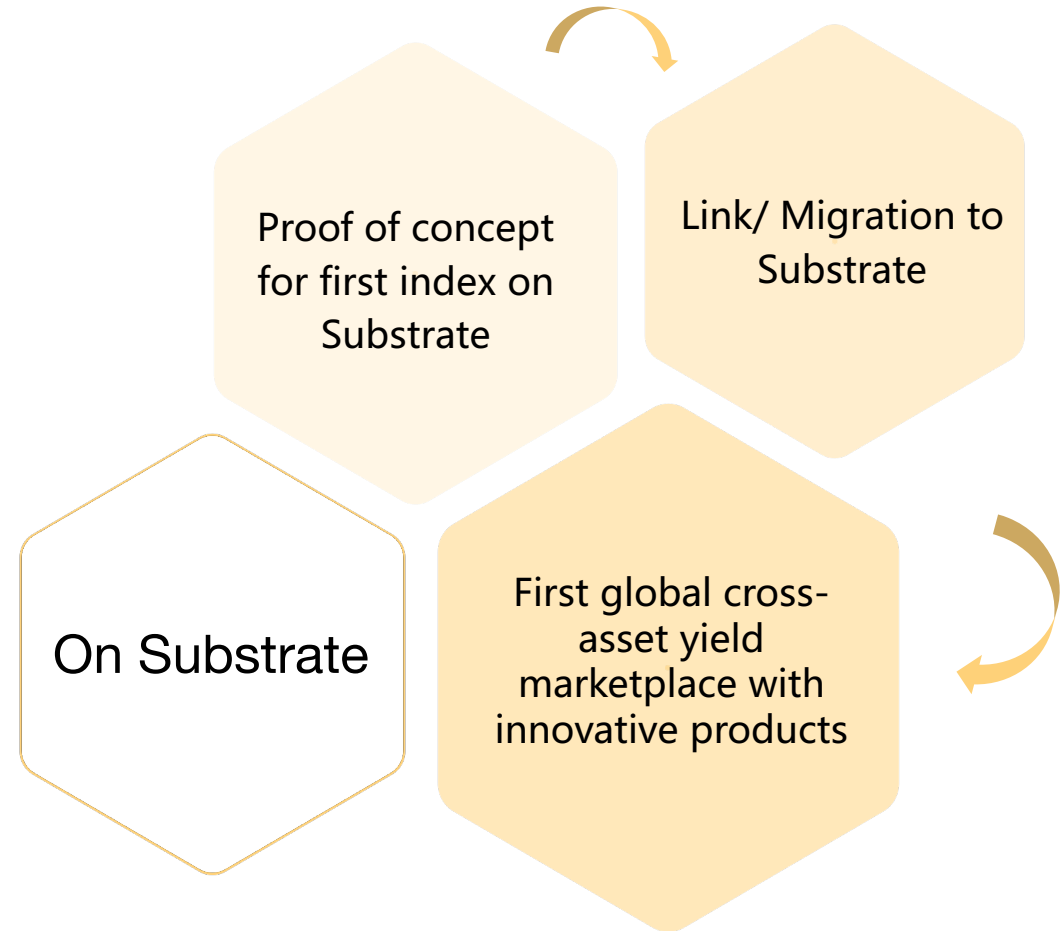

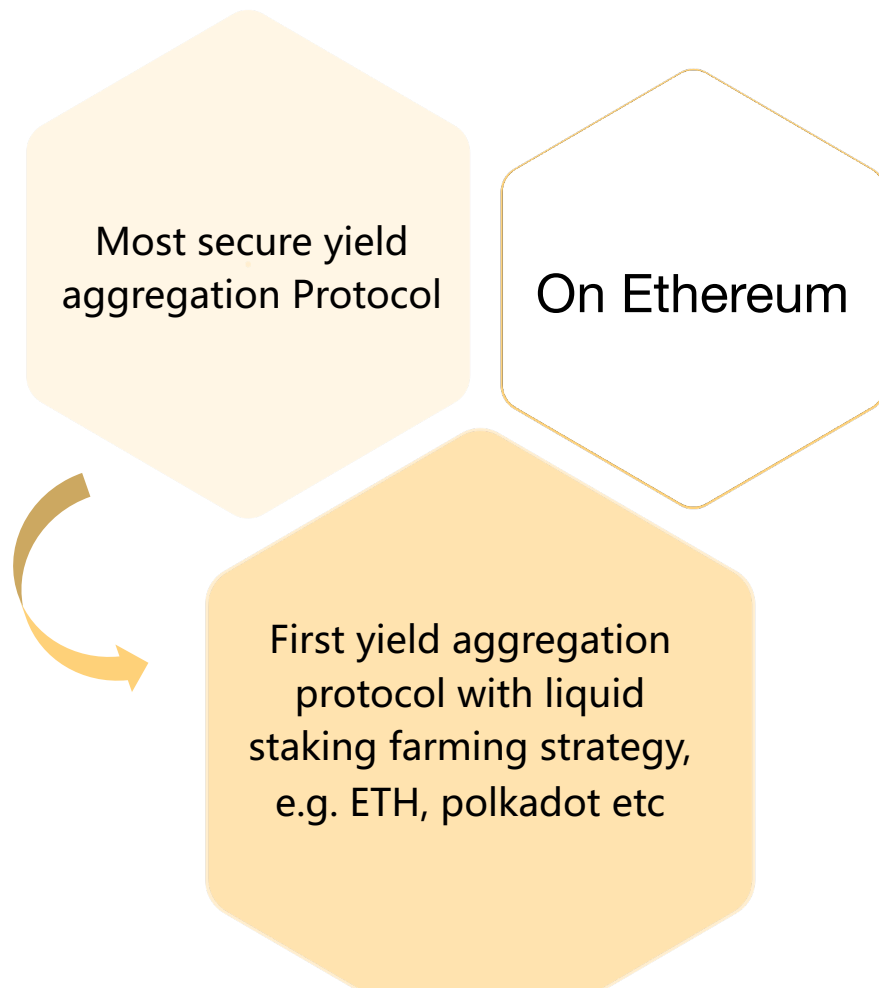

10.0% – 15.0% of platform profits will be charged as performance fees

Token Value Appreciation!

STONE: Technology

Development Phase 2021

STONE: Product Roadmap 2021

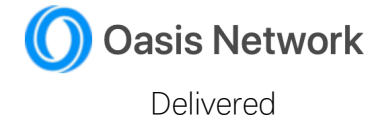

- Q1 2021**
 - Alpha launch of Stone yield aggregation platform with stable coin vaults
 - Alpha launch of Stone ETH2.0 staking assets aggregation platform with liquidity aggregation
 - Development of Stone yield aggregation platform with composability of other DeFi tokens
 - Beta launch of the Stone yield aggregation platform with multi assets in the DeFi market
 - TGE & Exchange Listing
 - Alpha phase of liquidity mining program
- Q2 2021**
 - Launch of sDOT to unlock the liquidity of staked DOTs
 - Launch of other liquid staked assets on Oasis, Solana and others
 - Alpha launch of Stone ETH2.0 staking assets aggregation platform with lending marketplace
 - Development of Stone staking assets aggregation platform with other POS chains
- Q3 2021**
 - Launch of index product on Substrate
 - Launch of interest swap/ tranche product with partners

Technology Development Team - RockX

- To bootstrap the technical development, RockX team and a few individuals from the DeFi community working to launch the alpha and public version of Stone protocol for the community and committed to lead the technical development for the next two years before the community decides the next steps.
- RockX is a development house with deep experience in blockchain development and runs various blockchain validators, such as Polkadot, Terra, Solana, Oasis. RockX has also committed 20 million USD to support the Polkadot Ecosystem in the next five years through technical and financial support.

Grants received from projects

Staking nodes for projects

Infrastructures built for ecosystem

Cyber security

IDE

Web Wallet and APP Wallet

Blockchain Validators

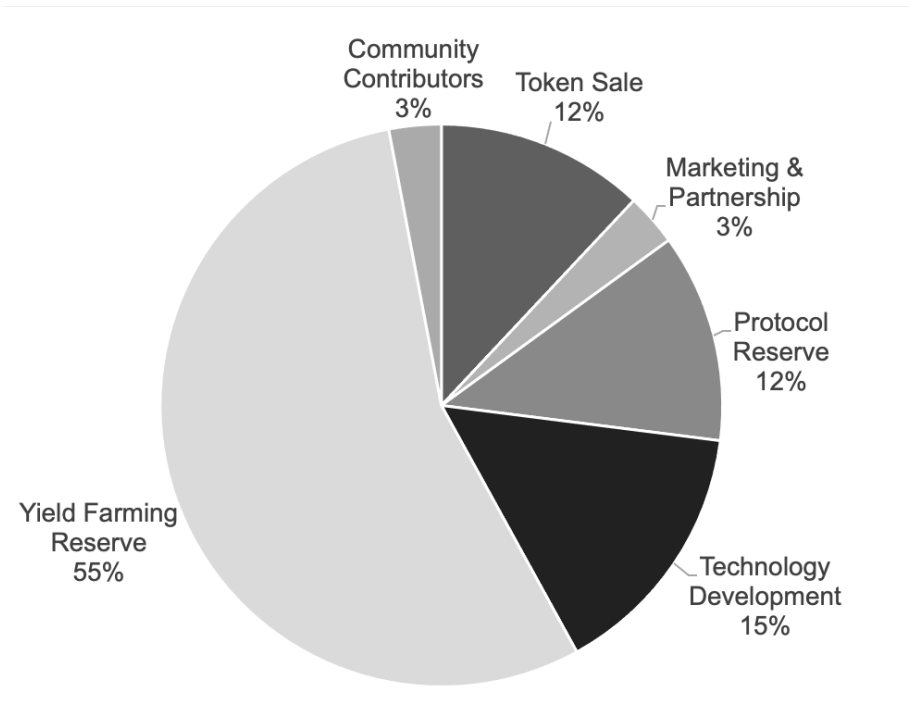

Crypto exchange

Decentralized Finance

STN Token: How will it launch?

Specifications	Description	Percentage
Token Ticker	STN	
Token Supply	100,000,000	100%
Token Sale	12,000,000	12%
Marketing & Partnership	3,000,000	3%
Protocol Reserve	12,000,000	12%
Technology Development	15,000,000	15%
Yield Farming Reserve	55,000,000	55%
Community Contributors	3,000,000	3%

- Community Contributors - 1 month cliff after Exchange Listing Date , daily unlock over 12 months.
- Marketing & Partnership - 1 month cliff after Exchange Listing Date , daily unlock over 12 months.
- Technology Development - 6 months cliff after Exchange Listing Date, semi-annual release following a vesting schedule of Three (3) years.
- Yield Farming - reserved for incentivising users after the token launch, but will be subject to the multiple phases' release.
- Protocol Reserve - this will be reserved for liquidity provision and other uses for protocol development and it will be only utilized on the need basis.
